

Project Design Phase-I Solution Architecture

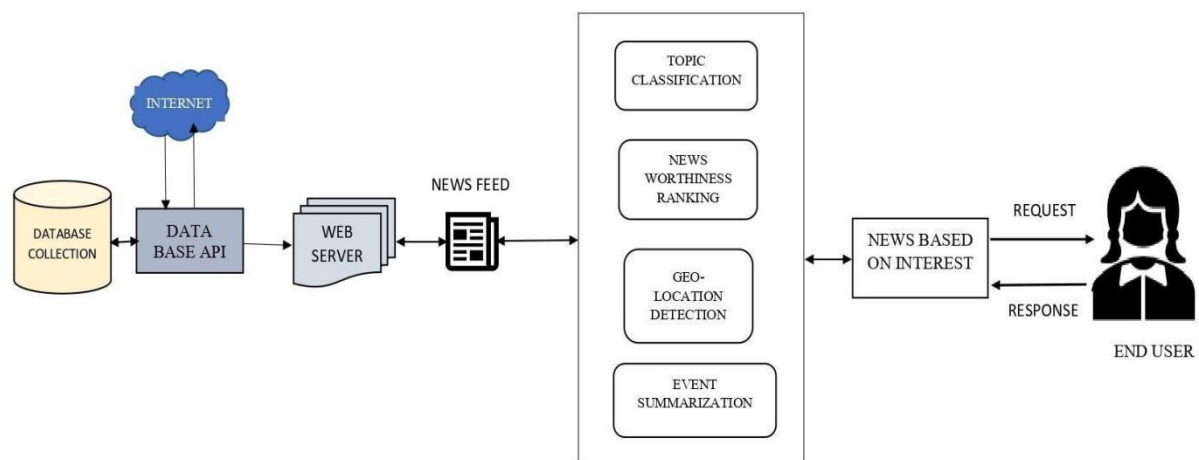

Date	11 October 2022
Team Members	Aswin, Harshad, Jayanthan, Jithin Suresh, Jijin Suresh
Project Name	News Tracker Application
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements to the project.
- Provide specifications according to which the solution is defined, managed, and delivered to the customers.

Example - Solution Architecture Diagram:
